Can anyone suggest It will be not achievable to possess actual Operating-system maps on your GPS but Garmin offer you UK topo maps that are created making use of OS map information.. 99 per map and OS Landranger road directions price £11 99 per chart. I have a mac computer as properly as a Gármín 60SCX I would like an Ordnance Survey map on both so that moves can end up being monitored on my GPS and shown on the MAC.. The plan expenses £69 50 and the Operating-system explorer road directions for it cost £19.
